

### Estimated Fish Landings (in tons) by Species Group and Site for 2001

Site	Snappers	Sharks	Dolphin	Wahoo	Tunas	Flying Fish	Lobster	Conch	Others	TOTAL
Castries	6.6	0.9	11.9	4.5	49.0	24.4	0.1	0.5	29.2	127.0
Choiseul	10.9	0.0	6.8	3.6	51.1	53.6	0.2	0.0	117.0	243.3
Dennerly	3.4	0.7	131.7	71.2	99.7	7.3	0.2	0.1	10.2	324.5
Gros Islet	3.2	0.7	15.3	1.9	13.4	125.1	8.1	29.5	39.3	236.6
Laborie	2.9	1.0	9.5	1.3	10.3	2.2	0.0	0.2	38.9	66.3
Micoud	2.2	0.2	31.2	17.2	23.9	7.6	0.1	0.0	10.4	92.9
Other	15.2	0.8	67.7	33.2	46.0	100.7	17.7	11.0	107.0	399.4
Soufriere	1.3	0.0	1.9	1.1	10.9	2.4	0.0	0.0	66.6	84.2
Vieux Fort	36.0	0.2	150.9	80.0	99.9	0.0	9.7	0.0	16.3	393.0
<b>Total</b>	<b>81.7</b>	<b>4.5</b>	<b>427.0</b>	<b>214.0</b>	<b>404.4</b>	<b>323.3</b>	<b>36.1</b>	<b>41.4</b>	<b>434.9</b>	<b>1967.2</b>

**NOTES :**

- (1). Preliminary estimates subject to change after final analysis.
- (2) "OTHER SITES" include all non-sampled sites – Canaries, Bannanes, River Doree, Savannes Bay, Praslin, Marisule, Monchy, Roseau & other minor sites in Vieux Fort.
- (3) "OTHER SPECIES" include all other family groups not individually listed such as nearshore pelagics, reef species and porpoise species.
- (4) Data collection re-commenced in Laborie in May 2001.

**SUMMARY**

1. Overall, 2001 recorded an increase 5.7% in total landings.
2. However, significant increase in production was observed for :
  - a. Flying fish - 224.8 t
  - b. Snapper - 13.6 t
3. Most other species groups recorded decrease production :
  - a. Dolphin – 23.1%
  - b. Tunas – 14.6 %
  - c. Wahoo – 11.9 %
